

Questionnaire regarding specific problems with dental treatment or sedation

In order to suggest the most suitable treatment option for you and to plan the treatment according to your needs, we would be grateful if you could answer the following questions.

1. What type of treatment do you think you may be likely to need?

Pain relief, extractions, fillings, general check-up etc?

.....
.....
.....
.....

2. Specific conditions related to your dental anxiety.

What are the biggest problems regarding having dental treatment?

- Extremely needle phobic generally, afraid of any injections?

.....

- Afraid of injections in the mouth,

.....

- Afraid of the drill,

.....

- Gag easily

.....

- Afraid of extractions,

.....

- Afraid that anaesthetic will not work,

.....

- Generally afraid of all dental work

.....

- Other

.....

3. Have you had sedation in the past?

What type?

How did it go?

.....

4. Do you have any other specific conditions that require special attention when you have dental treatment? Difficulty to open the mouth, difficulty to lie back in the chair, back problems, wheel-chair bound, jaw that locks easily, problems with swallowing - do you choke easily when you eat food?.....

.....

.....

.....

.....

.....

Many thanks!
